Mohamed Jamesha S

Full Stack Developer

Talented software engineer with a passion for developing innovative applications that expedite the efficiency and effectiveness of organizational success. Well-versed in technology and writing code to create systems that are reliable and user-friendly. Skilled leader who has the proven ability to motivate, educate, and manage a team of professionals to build software programs and effectively track changes.

Experience :

○ Software Intern

2020/07 - 2021/10

Edureka, Bangalore

Skills Used: Javascript, Html & CSS, Nodejs

Here we developed an application for a client to enable their customers to order food from client's restaurant. Through the app, the restaurant owner can manage orders, update status on the order and customers can order foods, track order, customise the dishes and much more.

○ Junior Full Stack Developer

2021/11 - 2022/05

Capital Setu, Dadri

Skills Used: Nodejs, Nextjs, MongoDB, Typescript

Here i worked on a application for a bike service company where the customers can book a service for their vehicle, see the status of service from pickup to delivery in portal as well as in notification mail and company can store customer and vehicle details and perform filtration and sorting on those records and see the details.

○ Junior Software Engineer

2022/04 - 2022/12

Edureka, Bangalore

Skills Used: Django, Postgres, Reactjs

Here I worked on a placement application with 3 kinds of login like Admin, Recruiter and Candidate. Here the recruiter can post jobs, add people within his organization and give certain permissions to them, candidates can share their skills and details, create a resume template and apply for jobs and Admins can view the app users and manage the database to configure masters and other features.

○ Software Engineer

2022/12 - present

NewSpace Research & Technologies, Bangalore

Skills Used: Reactjs, Redux, Nodejs

Created an app that runs on a ground control system and the system will be connected to antenna which inturn is connected to a swarm of drones in the field. Through the app, the pilot on the ground can able to plan missions for the drones to execute, get video feeds from them, do actions like bomb drop, self destruction, etc., download logs that happened during the mission, etc

Achievements :

- Recieved **Certificate of Best Performance** at Edureka
- Successfully completed 6 months of **Coding Bootcamp by 10x** **acedamy** where we solved 300+ DSA problems
- Worked on a verizon(US) project to implement various functionalities in their frontend application
- Worked with Indian Army to deploy swarm drones along the borders of india
